

Pack Inner Foil Print Registration

Accu-pac Foil - a Print Registration system for control of pre-printed foil on cigarette packing machinery.

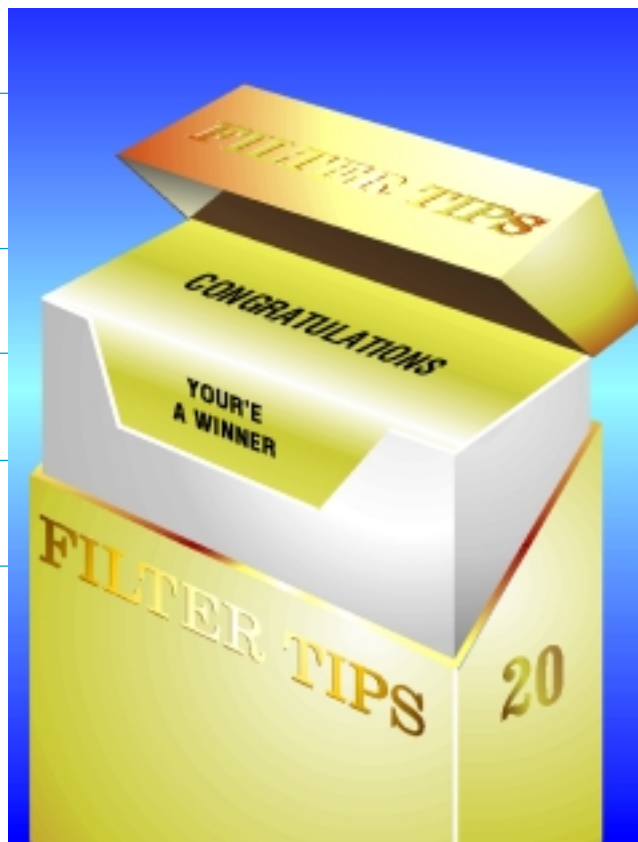

As a result of increasingly stringent advertising restrictions on the tobacco industry, **Accu-pac** has developed yet another method of **direct advertising** utilising existing packaging for **maximum impact at the point-of-purchase.**

By drawing upon the experience gained in the design and production of its **superior range of filmprint positioning systems**, IAS has developed Accu-pac Foil which utilises state-of-the-art servo technology to provide **unprecedented control in the handling of pre-printed pack inner liner foil.**

Accu-pac Foil is designed to be **retro-fitted to existing cigarette packing machinery** of any type or age such as GDX2, Focke 350, HLP1, HLP4 and can also be supplied with the **Accu-pac Web Alignment system** for edge guidance and control of the foil web.

Accu-frame Foil Print Registration provides :

- Another **innovative** solution for **on-pack marketing, advertising and promotions.**
- **Messages or graphics** can be added to the foil liner and positioned by Accu-pac Foil.
- Designed to be **retro-fitted** to existing production machinery.
- Designed for **quick installation** - typically in 2 to 3 days.
- Can be used with **printed or non-printed foils.**

For application of Accu-pac Foil to your particular machinery, please speak to **Industrial Automation Systems.**
