

Inner Frame Print Registration

A powerful new tool for cigarette marketing from Accu-pac.

As a result of increasingly stringent advertising restrictions on the tobacco industry, Accu-pac has developed yet another method of direct advertising utilising existing packaging for maximum impact at the point-of-purchase.

By drawing upon the experience gained in the design and production of its superior range of film print positioning systems, IAS has developed **Accu-pac Inner Frame Print Registration** which utilises state-of-the-art servo technology to provide unprecedented control in the handling of pre-printed inner frame card.

Accu-pac Inner Frame Print Registration is designed to be **retro-fitted to existing cigarette packing machinery** of any type or age such as GDX2, Focke 350, HLP1 and HLP4.

Accu-frame Inner Frame Print Registration provides :

- Another **innovative** solution for **on-pack marketing, advertising and promotions**.
- **Messages or graphics** can be added to the inner frame and positioned by **Accu-pac** Inner Frame.
- Designed to be **retro-fitted** to existing production machinery.
- Designed for **quick installation** - typically in 2 to 3 days.
- Can be used with **printed or non-printed inner frames**.
- Accu-pac Inner Frame does not effect the use of **GD Coupon feed**.

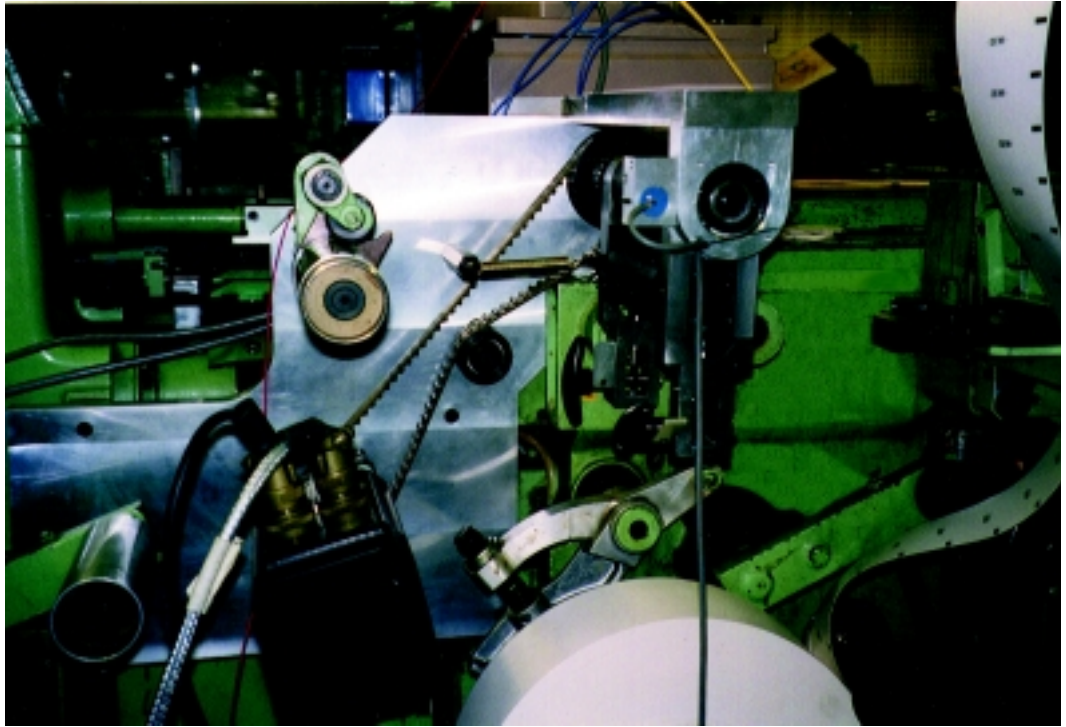

For application of Accu-pac Inner Frame to your particular machinery, please speak to Industrial Automation Systems.
